

Patient Information -> Visiting the Cardiologist[pdf](#)

Pediatric Cardiology Medical Group – East Bay cardiologists are available to perform comprehensive pediatric cardiology evaluations as well as fetal echocardiograms on a regular basis in several different locations scattered throughout the East and North Bay. The cardiologists have on-site access to all equipment necessary to complete the evaluation and can review the results of the study(ies) with you during the same visit. In some instances, the cardiologist may recommend an additional study, e.g. MRI or stress test, or a procedure, e.g. cardiac catheterization, which will be coordinated with you and your child's pediatrician. These additional services will usually be scheduled at Children's Hospital & Research Center Oakland.
